CAREER OBJECTIVE

Motivated web developer seeking a long-term role contributing to innovative web projects,crafting seamless digital experiences, and growing as a full-stack developer. Driven to solve real-world problems, collaborate with diverse teams, tackle new challenges, and deliver high-quality solutions that add value to clients and organizations.

WORK EXPERIENCE

Web Developer (Contract)

Pinnacle Event Rentals

June 2025 – Present **Brandon, MB, Canada**

- Develop and maintain a live WordPress website using Elementor, HTML, CSS, JavaScript, and PHP on a contract basis.
- Implemented inventory color filters and gallery functionality to enhance user experience and product discoverability.
- Customized themes, templates, and page layouts to match client requirements and improve site performance.
- Created responsive designs ensuring cross-browser and mobile compatibility.
- Collaborated with stakeholders to gather requirements, implement enhancements, and ensure smooth website operations.
- Tested and troubleshoot issues related to themes, plugins, layouts, and server environments.
- Documented solutions and created how-to guides to assist future website management.

PROJECTS

Bibliophile Club (Django Project)

Full Stack Developer

- Built a full-stack web application using Django, Python, SQL, HTML, CSS, and JavaScript.
- Implemented user authentication, crud operations, and book management features.
- Designed responsive UI and integrated image uploads and search functionality.
- Followed MVC architecture and best practices for clean, scalable code.

PSPBL Website Redesign (Capstone Project)

UI/UX Designer & Developer

- Conducted in-depth user research, competitor analysis, and wireframing among Figma.
- Designed a modern, accessible, and responsive website prototype focused on improving user engagement.
- Created interactive elements, layouts, and design system to enhance user experience.
- Presented final design and development plan as part of capstone deliverables.

Personal Portfolio Website

Developer

- Designed and developed a personal portfolio using WordPress, Elementor, and custom CSS.
- Showcases projects, skills, and experience with responsive design and contact integration.
- Optimized for performance, accessibility, and SEO best practices.

Additional Work Experience
